

ADITYA WARE

AI Engineer | adityaware132@gmail.com | +91-7046418735

LinkedIn | GitHub | Portfolio

EDUCATION

National Institute of Technology, Bhopal

2026 – 2028

Master of Technology in Artificial Intelligence

Thakur College of Engineering and Technology, Mumbai

2021 – 2025

Bachelor of Engineering in Electronics & Telecommunication

CGPA: 8.23 / 10.0

TECHNICAL SKILLS

Languages: Python, C++, SQL, Julia, R

Frameworks: PyTorch, TensorFlow, Keras, spaCy, HuggingFace

Tools: Git, Jupyter, AWS SageMaker, Ollama, MLflow

Databases: MongoDB, MySQL, SQLite3

Concepts: GenAI, XAI (SHAP, LIME), NLP, Deep Learning, Adversarial Training, RAG, Vector Databases, LLM Orchestration, Optimization, Statistical Learning Theory

EXPERIENCE

AI Engineer Intern – Prodrion

Jan,2026 – Aug,2026

Remote

- Engineered AI/NLP pipeline to automatically transform unstructured customer feedback into structured Product Requirement Documents (PRDs) and actionable specs.

AI Engineer Intern – Colage Communication

2025 – 2026

Maharashtra

- Engineered an end-to-end video synthesis pipeline integrating custom-trained latent diffusion models and temporal attention mechanisms; optimized inference throughput by 35% across 500+ video assets.

Freelance AI Engineer

2024 – 2025

Remote

- Delivered AI/ML solutions for clients across healthcare, finance, and content moderation domains.

Software Developer Intern – VanillaKart

2023 – 2024

Remote

- Built and optimized backend components for an e-commerce platform, improving query efficiency by 28%.

RESEARCH / PUBLICATIONS

Student-Teacher Architecture for Branch Staleness in Multi-Agent Autoresearch

- Proposed trajectory-aware teacher-student framework for asynchronous multi-agent autoresearch that estimates branch potential and enables selective single-change knowledge leakage to transfer useful discoveries between promising branches without synchronizing entire states, reducing branch staleness while preserving independent research and exploration diversity.

PROJECTS

Compact Language Model | *Python, PyTorch*

- Designed lightweight NLP model for low-resource language translation achieving BLEU score of 28.5 on Tiny Stories dataset.

Medical Assistant (Text + Image) | *Ollama, PyTorch*

- Constructed a multimodal vision-language framework combining vision backbones with local LLMs (Ollama) for cross-modal medical query reasoning and visual diagnostic retrieval.

Bias-Aware Classifier | *Fairlearn, PyTorch*

- Built fairness-driven classifier for financial credit scoring, reducing Equalized Odds Difference by 30 percent across demographic groups using SMOTE and Fairlearn constraints.

HONORS & AWARDS

Google Solution Challenge 2024 – Mumbai Region Qualifier

Google Ideathon – 3rd Place

Avishkaar Convention – Institute Winner
